FILE HEADING

Davangere Water Supply project.

From The Chief Engineer Bangalore

No 1944 Dated 24 2 1914 Received 26 2 1914

Diary No 483 | Enclos 4 Spare Copies | Serial No 1

BRIEF ABSTRACT OF LETTER

Forwards letter No 3068/12 2-1914 from the Collector, Chitaldroog Dist. on the Davangere Water Supply project and states that the drawing & the remarks together with the Engineer's report sent with the above letter have been sent to the Superintending Engineer, Southern Circle for opinion & that they will be communicated to Govt as soon as they are received back from that officer.

NOTES AND ORDERS

The following facts are gathered from the Correspondence.

(1) Cost of the Water Supply Scheme — original Rs 1,34,000. Revised 1,64,000. Final 2,08,832

(11)

NOTES—First Sheet

GPS—3,000 15-6-12

[illegible]

General and Revenue Secretariat

Irrl File No. 287 of 1913.

Serial No

Rs

(II) Annual maintenance of the works } Working expenses 7,500 Depreciation from 9,432 16,932

(III) Means of financing the Scheme

The Irrl Cl estimate the assets as follows by the end of June 1914.

(a) Cherry balance from Rs 1913 Rs 1,21,000

(b) Realisation from the Sale of Debts in the Shenmaneadoo pet Extension } 30,000

(c) Govt Grant in aid promised for the Scheme } x 30,000

Total Rs 1,81,000

x Vide para 1 of the statement appended to Govt G.O. No 2015 F. 2308 dated 14th May 1913

The balance required for meeting the cost of the Scheme Rs 27,832, which they propose to meet by the time before which the work will be completed from savings "to be effected by economising expenditure in every possible direction" In case the Scheme cannot be ordered to be put in hand for want of the small sum the Irrl Cl request that the amount may be advanced by Govt & they promise to adjust the advance as early as practicable (in 1 or 2 years) The Irrl Cl is not in favour of raising a loan.

Contd sheet

[illegible]

-i Thus the total amount that would be available over the ordinary expenditure is Rs 23,852 out of the annual sum abt Rs 16,932 will be required for recurring annual expenditure on the town water works Still there remains a sum of Rs 6,920/

-x Annual maintenance } Rs 7,500
Depreciation charges } 9,432
16,932

25 The Municipal Council can at once pay for the 1st Stage of the Water works. They will not be able to meet the Cost of the subsequent Stages out of their Surplus revenue by annual instalments they will have to borrow the required funds and liquidate the loan out of the sum of Rs 6,920/ mentioned in the above para.

26 In the calculations made in para 24 supra, the opening balance for 1908 09 and the closing balance for 1912 13 have not been taken into account The Mun Cl are expected to have abt Rs 19,824/ as balance (excluding Rs 84,000 required for Water works) at the end of 1913 14 which is more than double the working balance

6 The Municipality is in a flourishing condition and has accumulated a large sum for carrying out the water supply project. Out of the total amount of Rs 2,08832 required on account of the project only a sum of Rs 1,12,000 can be spared out of the closing balance leaving a sum of about Rs 9,000 as working balance for the Municipality If Govt contribute Rs 30 000 the total will amount to Rs 1 42,

7 The sites in the extension have not yet been sold Their sale and realization of proceeds will necessarily take up some

G S No 8462-4 / Mel 110 1322 O 12/3/14

Govt sanctioned these Sale The sales work not be delayed helpful

Consequently the amount of Rs 30,000 expected from this source will have to be omitted for the present.

8 The balance required to finance the project is Rs 66832 Until the Municipality is in a position to find this it is desirable to postpone the undertaking.

Sd/- [illegible] 14/3/[illegible] 16/3 Sd/- [illegible] 16-3-[illegible]

9 The Municipal Councils fear in raising a debenture loan is groundless. If the amount got by sale proceeds of the Chama Rajendrapet extension site is credited to the Sinking fund the annual contribution to the Sinking fund may be materially reduced. If the Govt grant be also taken into account the amount to be borrowed may not be as large as Rs 81000 and the interest and sinking fund charges will be considerably lower.

10 On the whole I think there need be no difficulty in this case about the initial expenditure as the Municipality has already got a substantial sum of Rs 1,12,000 for the purpose. The Govt

Serial No 166

grant and subsequent sales will amount to about 60 thousand more. The real deficit is therefore only about 36,000 which the Municapality should certainly be able to raise as a loan.

11 If therefore the Municapality can show how it can meet the working & depreciation charges amounting to about Rs 1,700 per annum the work may be taken in hand. If the Municapality is really unable to raise Rs 36000 by debentures I would even agree to a loan from Govt to this extent at 4/. to be repaid by equated instalments in 20 years. It would be a pity if a water supply scheme in an important town in such circumstances as these has to be postponed or given up. The municapality has made commendable efforts to finance the scheme and all that is needed is a little sympathetic guidance & encouragement to make it overcome all difficulties.

Mr. Jr has noted in Mun file 48 B— of 1911 (para 37), the Financial Secretary opined that the Davangere Municipal Council would be fully able to meet the maintenance & other recurring charges and recommended the preliminary sanction to the proposal of the Mun[l].

He, however, sounded a warning note that doubling the rates of toll might not result in doubling the revenue therefrom.

flag C

15 From the Statement furnished by the Sub Dy Collr of Davangere, it is seen that the Contractor the collection of tolls has been leased out at Rs 22,200 for 1913-14 which is more than double the estimate for 1912-13 i.e estimate prior to the doubling of rates, and Rs 5,200 more than the estimate for 1913-14.

Budgets for 1912-13 & 1913-14 put up Q & A

Therefore the ability of the Council to meet recurring charges apt to be beyond question the Mun[l] is now in a fair way

Office of the Deputy Commissioner,

Chitaldrug District.

Dated Chitaldrug, 13th February 1914.

From

V. R. Thyagaraja Iyer Esquire M.A.,

Deputy Commissioner,

C h i t a l d r u g

To

K. R Srinivasiengar Esquire M A.,

Secretary to the Government of

H. H. the Maharaja of Mysore,

Genl. and Revl Departments,

B a n g a l o r e.

THROUGH The Chief Engineer.

S I R,

Adverting to para 4 of Government Order No 3066-8/...1.48-11-17 dated the 14th October 1912 re the water supply scheme of Davangere town, I have the honor to submit herewith the detailed drawings and estimates for Rs 2,08,832 with a report received from the Executive Engineer, Water Supply and Stores Division with his letter No.2783 dated the 2nd December 1913 and to state as follows -

The project was originally estimated at Rs 1,34,000 roughly and the estimate was revised subsequently to Rs 1,64,000 by the D.P.W.(vide subject No.1 of the Dewan's Tour Order published with Government Proceedings No.2015-9/G.M.149-13-1 of the 30th August 1913).

2 As directed in the Government Proceedings referred to above, the detailed estimates &c, got from the Water Supply Division were sent to the Davangere Sub-Division Officer who presides over the Davangere municipality with a request that the same may be discussed at a meeting of the Municipal Council and a report submitted about the ways and means of financing the project and also as to whether the municipality was prepared to raise debenture loans to meet the cost.

3. I enclose herein a copy of the resolution of the municipal council and a copy of the report from the President of the

municipality. It will be seen therefrom that the municipality is not agreeable to raise any loan by the issue of debentures for reasons fully set forth therein.

4. The council expect to have to their credit at the close of the current official year a sum of Rs 1,21,000 as per enclosed statement which together with the grant of Rs 30,000 graciously promised by Government will bring the total amount at their credit to Rs 1,51,000 Adding to this, the sum of Rs 30,000 anticipated to be realized by the sale of valuable sites in the extension of the town, the council hope to have a total sum of Rs 1,81,000 at their credit on the 1st of July next and they propose that with this balance the project may be ordered to be put on hand at an early date they being allowed to supply the rest of the funds(by the time before which the work will be completed) from the savings to be effected by economising expenditure in every possible direction

5. Further, they propose that in case the D.P.W. cannot undertake the project until the entire cost be placed at their disposal, the municipality may kindly be granted an advance of Rs 28,000 to be adjusted as early as practicable I consider that their request in this connection may be graciously complied with, the more especially as the municipality has come forward with such an enormous sum after sacrificing their conveniences by cutting down expenses for the past two years In case the Government are not disposed to grant their prayer, the project will have to be taken up and worked out after the municipality accumulates the entire funds required to carry it out which will be not later than the 1st July 1916.

6. The favor of early orders of Government is solicited

I have the honor to be,

S I R,

Your most obedient servant,

Deputy Commissioner,
Chitral Dug District

S.V.

Em Bnd 257-13/11

Copy of letter No.318 dated 13th January 1914 from the Sub-Division Officer, Davangere, to the Deputy Commissioner, C h i t a l d r u g.

With reference to your docket No 717 dated 11th December 1913 asking me to place before the Davangere Municipal council the estimates for Rs 2,08,832 on account of the Davangere water supply scheme for their approval and submission of proposals about the ways and means for financing the project, I have the honor to forward herewith the resolutions of the Municipal council come to at the special meeting held on the 9th instant. As the question was an important one affecting the well being of Davangere, some of the leading citizens were also invited to be present at the meeting

2. The Deputy Commissioner's docket under reply as also the D.O. letter of the Executive Engineer, Water Works Division which gives the details of working expenses and other information were read over to the members present and the financial aspect of the question in the light of the above two communications was fully gone into

3. The suggestion contained in your docket No.717 dated 11th December 1913 as regards the raising of a debenture loan of Rs 81,000 was considered in detail as also the future financial position of the municipality in the event of the debenture loan being raised It was made clear to the members that they would have to provide for an annual allotment of Rs 25,000 for the next 20 years as indicated below -

To working expenses as per Executive Engineer's D.O.	Rs 7,500
To Depreciation fund.	9,432
To interest at 5% on the debenture loan of Rs 30,000	4,000
To sinking fund for repayment of the loan	4,000
Total	Rs 24,932

4. All the Municipal members with the exception of one

Councilman were of opinion that the proposed raising of the debenture loan was not advantageous to the municipality especially in view of the fact that the trade of the town was going down day by day and the present municipal income cannot therefore be considered as by any means steady It was pointed out that the trade in grains in Davangere had gone down quite 50% since last year as road side stations had commenced to do business direct with outside markets and the income from tolls had already got affected The trade in cotton also threatened to follow suit as several Ginning Factories are springing up at Harihar, Kottur and other places which at present send their cotton to Davangere for ginning, pressing and sale. The Municipal Council therefore were of opinion that with so many factors at work to undermine the trade of Davangere they would not be dealing fairly with the municipality by burdening the Municipal income with such a heavy annual expenditure

5. The municipal council therefore resolved to place before you an alternative suggestion and respectfully request the favor of your kindly recommending the same for the favorable consideration of Government. Their financial position will be as follows -

They expect to have at their credit at the end of the present official year a sum not less than R$ 1,21,000 as per Budget estimate(enclosed) for 1913-14 which together with the grant of R$ 30,000 so graciously promised by Government will bring the total amount at their credit to R$ 1,51,000 As pointed out in a previous communication they hope to realize nearly R$ 30,000 from the sale of the sites in the extension In this connection I am asked by the council to respectfully point out with reference to the remarks contained in para 4 of your docket No 717 dated 11th December 1913 that the sale of the sites and the realizations of their value are neither problematical nor distant On the other hand, possible buyers of the sites have registered their names though informally,for particular sites and as soon as the Government Orders are received the sales of most of the sites will be held immediately and money promptly

realized. The municipality are fully confident that this asset may be treated as quite a liquid one and realizable without any delay That being the case, the funds at the disposal of the Municipality at the end of the official year may safely be taken as R$ 1,80,000 There will then be only a balance of R$ 20,000 which the municipality are confident to make up by the time the works are completed

6. If on the other hand the ways and means for financin the water-supply project as indicated above are considered by Government as too prospective to justify the D.P.W undertaking the project at once, the municipality respectfully beg the Government to advance them the balance of funds necessary to complete the project, after taking into account the amount at the credit of the municipality, the Government grant of R$ 30,000 and the amount realizable from the sale of the sites The municipal council have every hope that the amount advanced by Government will be adjusted in a year or two at the most.

7 In conclusion I am asked to state that while the municipal council are extremely anxious to have the water-supply project taken on hand immediately and completed early and are well aware that the raising of a debenture loan would solve the question of ways and means most readily and satisfactorily, they are afraid that the obligation to make provision for paying the annual interest of about R$ 4,000 and for the sinking fund of R$ 4,000 to repay the loan, will swell up the annual allotment for the next 20 years to the abnormal high figure of R$ 25,000 a year to supply water for a normal population of only 10000

8 I return herewith the entire file of papers on the subject.

Mysore Public Works Department,

No 3507
Encl 3

Central Office,

Dated Bangalore, 14th April 1914.

D5800

From

K.Krishnaiengar, Esq., B.A., L C E.,

Offg Chief Engineer of Mysore,

Bangalore,

To

V.R.Srinivasaiengar, Esq., M A ,

Secretary to Government,

General and Revenue Departments,

Bangalore

Sir,

8C/

In continuation of this office No 1944 dated the 24th February 1914, I have the honour to forward herewith the drawings and estimates relating to the scheme for water supply to the town of Davangere, together with a copy of letter No 2361 dated the 31st March 1914 from the Superintending Engineer, Southern Circle, furnishing his opinion on the proposals

I have the honour to be,

Sir,

Your most obedient servant,

Offg Chief Engineer of Mysore

V M S.

Gen & Rev 287-13/SL 15

Letter No.2361 dated the 31st March 1914 from the Superintending Engineer, Southern Circle, to the Chief Engineer of Mysore

---

Adverting to your No.1943 dated the 24th February 1914 forwarding detailed drawings and estimates for water supply to Davangere town for furnishing my opinion on the proposals, I have the honour to return the above as received and to inform you that the proposals of the Executive Engineer are generally sound A few details will be susceptible of being modified during execution of the work.

2. The provision of subsidence tank and gravity filters is an improvement on pressure filters and their extra cost is not very great The advantages will out-weigh the additional outlay As regards the cost of the whole project which is Rs 74,832 above the original preliminary estimate the bulk of the excess, viz , Rs 57,040 is due to the provision of bigger sized pipe line as per Dewan's orders

3 If this be excluded the net excess is only Rs 17,792 which is not at all excessive considering that we have a subsidence basin, a gravity filter, and duplicate pumping plant

Para 4 of G P No 3066-8 Jrl 48-11 17 dy the 14th October 1912 directing the Deputy Commissioner, Chitaldroog District, to have the ~~ORDER THEREON. Nor~~ Water Supply project fully worked out in detail and to submit it for orders through the Chief Engineer

2 Item No 1 in the Statement appended

order

SUBJECT

23/5/14 23/5

appended to G O No G 2015-9
G M 149-13-1 dy the 30th August 1913
stating that a contribution of
Rs 30,000/ would be paid by Govern-
ment if the Davangere Municipal
Council raise a loan of Rs 60,000/
by means of 5% young debentures
towards the cost of the project
in question

3 Letter No 306 dy the 12th February
1914 from the Deputy Commissioner
Chitaldurg District, reporting
that the project is estimated to cost
Rs 2,08,832, that the Municipal
Council would be able to finance
the Scheme at the end of June 1914
to the extent of Rs 1,81,000, as detailed
in the margin, that the balance
amounting to Rs 27,832/ would
be made available during the progress
of the work from their current
revenues, and stating that in
case the project cannot be put in
hand by the Public Works Department

		Rs
1	Closing balance for 1913-14	1,21,000
2	By sale of Sites in the Extension	30,000
3	By Government grant	30,000
		1,81,000

2. It is evident from the accounts that the Dabangere Municipal Council can at once pay a sum Rs 1,42,000/ including the Grant sanctioned above. In regard to the balance of Rs 66,832/ a sum of Rs 30,000/ is reasonably expected from the sale of sites in the extension, authorized in G O No 8462-4 Mdl 110-13-22 dated the 12th March 1914, and it is hoped with good reason that the deficiency can be substantially made good by the savings anticipated at the end of 1914-15 In S circumstances, the question of Government advancing to the Municipal Council a loan of such amount as the latter cannot spare from their revenues, is deferred until the available amounts are nearly spent

3 The Chief Engineer is requested to report what amount is required for
